Technical Data Sheet & Warranty Terms

Polyethylene Edge Vapour Barrier System

1. PRODUCT DESCRIPTION

Proprietary engineered Edge Vapour Barrier supplied in kit form for site installation.

2. FEATURES & BENEFITS

• HDPE membrane

• Reduces risk of moisture ingress, mould, and flooring failure

3. APPLICATIONS

• Residential slab-on-ground

4. TECHNICAL SPECIFICATIONS

Material: Polyethylene (HDPE)
Thickness: 2mm
UV Resistance: Limited

5. INSTALLATION REQUIREMENTS

• Refer to the installation guidance and video available at www.slabsolutions.au

6. LIMITATIONS

Performance depends on project design and installation quality. Not suitable for long-term UV exposure or unsupported use.

7. STORAGE & HANDLING

Store in dry conditions. Avoid sunlight and extreme heat. Prevent damage during handling.

8. WARRANTY

Product complies with specifications at time of supply. Warranty is limited to replacement of defective material and is only for material proven to be defective prior to installation. This warranty excludes installation damage, slab failure, moisture ingress, and any consequential loss.

In all circumstances installation of the Product shall be deemed as acceptance of its condition. Slab Solutions Pty Ltd will not be liable for any claims, defects, or warranty obligations for Products that have been installed, altered, or otherwise used after delivery, regardless of whether the defect was apparent or discoverable prior to installation.

It is the sole responsibility of the Installer to ensure that the product is fit for purpose and free from visible defects before installation by any person. Failure to notify Slab Solutions Pty Ltd of any issues prior to installation will void all warranties and claims associated with the affected products.

9. COMPLIANCE

This product is manufactured to meet the **material performance** requirements for vapour barrier / damp proofing membranes used in association with concrete slab-on-ground construction designed in accordance with AS 2870 – 2011.

Compliance with AS 2870 is dependent on correct installation in accordance with the Standard and the installation guidance available at www.slabsolutions.au. Any guidance provided by Slab Solutions Pty Ltd is general in nature. The installer is responsible for ensuring compliance with all applicable standards and specific project requirements.
